## GAMEPLAY

- Play cards to win tricks and to manipulate stock prices.
- No need to follow suit. Play any card. Ties are broken by current stock prices.
- Win the trick and add the cards from that trick to your portfolio.
- Play 5 of 7 cards. Last 2 cards go directly to your portfolio.
- Earn money each round by having the first, second, or third most shares of a company (based on the company's current stock price).
- Forward momentum of stock prices means later rounds are worth more points than early ones.
- Most money, after 4 rounds, wins the game!

## GAME COMPONENTS

- 35 Main Deck Cards
- 5 End-of-Round Payout Cards
- 1 Price Board with Score Track
- 5 Money Trackers (colored cubes)
- 5 Stock Price Trackers (white discs)
